

Core Elements of Reality's Programs

Community Based

Reality Ministries founded the Reality Center in May of 2008. The Reality Center is a tangible expression of our desire to be an incarnational, community-based ministry. We are excited about volunteers serving at the Reality Center every afternoon, and about it being available for volunteers to use as a base of operations as we reach out to the young people of the community.

Adventure

A life with Jesus Christ is full of adventure and in Reality Ministries we seek to provide adventure opportunities for our adolescent friends. Each trip is designed to get young people away from their daily norm, to broaden their horizons by exploring God's beautiful creation and to experience new and exciting activities. As with all of our programs, the adventure trips function to provide a shared experience for different sub-groups of adolescents in a way that lends itself to personal leadership development and spiritual growth.

Servant Leadership

Reality Ministries believes in Servant Leadership – our staff and volunteers lead by demonstrating what it means to serve. As an extension of this leadership philosophy, teenage participants in Reality Ministries will continually have the opportunity and will be encouraged to serve. Service will be done at the local, national, and international levels. Young people of different economic and ability levels will have the opportunity to identify needs and together serve the Durham-Chapel Hill community and other people and communities around the world.
